(54) **Transmission and/or reception of signals**

(57) A signal is transmitted which includes personalized information including data representing information about specific programs targeted for a specific viewer.

A reception apparatus comprises:
 an extraction unit (22, 23, 28) for extracting the data representing the information about the specific programs from the broadcast signal received; and a display

unit (26) for displaying the information about the specific programs on the basis of the data representing the information about the specific programs.

A transmission apparatus comprises:
 means (10, 1, 2, 3) for generating the personalised information including the program data; and
 means (7, 8, 9) for combining the personalized information with a broadcast program signal.
